

ARI MAHENDRA

FULL-STACK PRODUCT BUILDER & ENTERPRISE SAAS ARCHITECT

Founder of Kios Market (3 Live Apps on Google Play Store) | Specialist in Flutter Monorepo, GCP Serverless & AI Systems
Portfolio: arimahendra.web.id | Google Play: [Ari Mahendra](#) | GitHub: github.com/kios-market

CONTACT & PORTALS

- **WhatsApp / Phone:** +62 852-6307-4753
- **Email:** arimahendra1202@gmail.com
- **Web Portfolio:** arimahendra.web.id
- **GitHub:** github.com/kios-market
- **Location:** Duri, Riau, ID (Open to Remote / Hybrid Worldwide)

ENGINEERING CAPABILITIES

- Custom Enterprise SaaS & B2B Portals
- Multi-Tenant RBAC & Access Control
- Financial Ledger & Anti-Fraud Engines
- Live Sub-Second Real-Time Spatial Tracking
- Automated Billing, Payouts & Commission
- AI-Powered Workflow & Ingestion Pipelines

COMPLETE TECHNOLOGY STACK

Mobile & Frontend:

- Flutter & Dart (Multi-App Monorepo)
- React.js, JavaScript (ES6+), HTML5/CSS3
- Progressive Web Apps (PWA) & Jamstack

Backend & Microservices:

- GCP Cloud Functions (40+ Serverless APIs)
- Node.js, Express, RESTful APIs, JSON Pipelines
- PHP & Laravel (SaaS Backend & Multi-Tenancy)
- Python (Scripting, Automation, OpenCV, AI)

Databases & Realtime:

- Google Firestore (NoSQL Document Store)
- Firebase Realtime Database (RTDB Tracking)
- PostgreSQL, Supabase, MySQL

Cloud, AI & DevOps:

- LLM Prompt Engineering & Autonomous Agents
- Cloudflare Pages & Cloudflare Tunnels (Zero Trust)
- Oracle Cloud (OCI 12GB) & AWS Lightsail
- Tailscale Private Mesh VPN, Git, PM2 Daemon
- Linux Sysadmin (Ubuntu, Oracle Linux)

EDUCATION & METHODOLOGY

- SMAN 1 Mandau, Bengkalis** (Science/IPA, 2017)
- *Autodidactic Software Engineering based on real-world production projects & deployments (2017 – Present)*

EXECUTIVE SUMMARY (PRODUCT BUILDER & SAAS ARCHITECT)

Self-driven **Product Builder & Enterprise SaaS Architect** with a proven track record of designing, building, and deploying production-grade software ecosystems published on **Google Play Store** and global cloud networks. Deeply experienced in bridging complex operational business workflows—from on-demand multi-app marketplaces and cooperative banking SaaS to distributed video streaming—with robust modern cloud infrastructure (**40+ GCP Cloud Functions, Flutter Monorepo, and Autonomous AI Workflows**). Delivers end-to-end solutions from zero to one: data architecture, financial ledger security, and self-hosted cloud deployment.

FEATURED PRODUCTION SOFTWARE & ENTERPRISE SAAS

1. Kios Market Ecosystem (kiosmarket-v2) — Founder & Lead Architect **Hyperlocal Multi-App Marketplace & On-Demand Logistics Platform — Duri, Riau**

Stack: Flutter Monorepo, GCP Cloud Functions (40+ Services), Firestore, Firebase RTDB | Web: kiosmarketindonesia.id

- **Published on Google Play Store (Developer: Ari Mahendra):** Unified 3 distinct production applications within a single **Flutter Monorepo**: *Kios Market* (Buyer), *Kios Market Merchant* (Seller), and *Kios Market Driver*.
- **40+ Serverless Microservices:** Architected and deployed scalable backend on GCP Cloud Functions handling distributed order management, dynamic distance-based delivery fee calculations, and multi-tenant authentication.
- **Sub-Second Live Geo-Tracking:** Implemented low-latency real-time courier tracking utilizing **Firebase Realtime Database (RTDB)** coupled with spatial mapping APIs.
- **Financial Integrity Engine:** Engineered an internal double-entry ledger system securing wallet balances, automated multi-party commission distribution, and fraud protection against double-spending.

2. Koperasi Mandiri Utama Seroja — Enterprise SaaS Architect & Developer **Enterprise Employee Cooperative & Financial Management Web SaaS**

Stack: PHP, MySQL, Bootstrap, REST APIs | Live Production: koperasi-mandiri-utama-seroja-v2.vercel.app

- Designed and deployed an internal SaaS application digitizing enterprise employee cooperative workflows: centralized member databases, savings ledgers, and loan lifecycle management.
- Developed an automated loan installment calculation engine and periodic financial balance sheet reporting for accounting transparency.
- Enforced strict Role-Based Access Control (RBAC) across administrators, treasurers, and cooperative members with encrypted data security.

3. KiosMovie Video Streaming Platform — Founder & Full-Stack Engineer **Distributed Edge Video Streaming Service with Automated AI Pipeline**

Stack: Cloudflare Pages, Node.js API, Cloudflare Tunnels, PM2, LLM Ingestion | Live: kiosdracin.pages.dev

- Built a high-performance Jamstack web frontend on **Cloudflare Pages** (kiosdracin.pages.dev) delivering sub-second edge latency worldwide.
- Secured the Node.js backend hosted on an Oracle Cloud VPS using **Cloudflare Tunnels** (`cf-tunnel`), establishing a Zero-Trust network without exposing open public server ports.
- Created an **Automated AI Ingestion Pipeline**: automated buffer channel monitoring, video episode integrity validation, and automated Indonesian synopsis generation using LLMs.

4. Smart Cloud POS & Autonomous AI Multi-Gateway Infrastructure **Cloud-Synced Offline-Ready Retail POS & Self-Hosted Multi-Cloud Mesh Network**

Stack: JavaScript, Firebase PWA, Python, OpenCV, AWS Lightsail, OCI 12GB, Tailscale Mesh VPN

- Engineered an offline-ready PWA for rapid retail transactions, multi-category inventory tracking, daily turnover reconciliation, and digital thermal receipt generation.
- Deployed intelligent Telegram micro-gateways (`@pantaukesehatanbot` and `@penghilNgbot`) zero-storage OpenCV image cleaner).
- Architected a self-hosted hybrid cloud mesh connecting Oracle OCI, AWS Lightsail, and on-premise hardware via **Tailscale Private Mesh VPN**.

ENGINEERING VALUE & PRODUCT OWNERSHIP

- **Enterprise SaaS Ready:** Battle-tested building transactional multi-role business applications (marketplaces, credit cooperatives, and retail POS).
- **High-Velocity Execution:** Leverages *AI-Accelerated Engineering (Vibe Coding)* to transform ideas into live production software in days, not months.
- **Cost-Optimized Cloud Architecture:** Expert at maximizing serverless tiers, zero-trust cloudflare routing, and high-performance minimal-cost cloud infrastructure.
